GREETINGS FROM THE PRESIDENT

PROF. DR. MARGIT FISCH

Dear urologists, dear Ladies and Gentlemen,

We, the team of the DGU, the programme committee as well as everyone involved in the organization invite you warmly to the **74th congress of German Society for Urology registered association to Hamburg from 21 - 24 September 2022**. After all the restrictions due to the Corona pandemic in the last one and a half years, we are looking forward to a meeting that is taking place in person. There is a large request for direct scientific and personal exchange: to watch presentations in person instead of through a monitor, to hold lively discussions and meet up with colleagues and friends. Therefore, interactive formats (pro/contra sessions; discussion rounds) will have a special focus in Hamburg. For everyone who unfortunately can't take part we will offer a small choice of thematically interesting live sessions and further sessions will be available "on demand" for repetition.

Motto of the congress "Shaping the future together"

The Corona pandemic will have a huge impact on medicine and health care. What have we learnt? What do we need to change? Questions that will be addressed at the congress on behalf of the urology department. BvDU and DGU are both equally challenged. We as urologists should help to shape the future instead of letting others shape it. We should participate in this process together as a unit of colleagues in hospitals, practices and as doctors with hospital affiliation. The motto of the congress should be an encouragement to do so and topic contents should give impulses. In consequence of the pandemic the digitization will also progress even more. This provides the advantage of a stronger - also transsectoral - connection. Through the exchange of data, a better communication and patient care is provided. Further training for our young professionals can also only succeed if we work on it together. The new Model Specialty Training Regulation makes it possible to acquire a part of the required competences for the outpatient area. Alliances between practices and clinics would make sense. The congress should pay its contribution to collectively relaying the content of urological further training. Together with the work groups and GeSRU we are offering guideline reviews, exciting forums, courses and the notorious "nightmare conference". Through the TeamAkademie, the DGU wants to provide a platform for urological further training for assistance professions and nursing professions as well as medical assistants in clinics and practices. To provide good care for patients a competent team that works together is needed.

Another future topic is the strong growth of individual therapy for our patients, especially in the urooncology department. Acting together in interdisciplinary teams with urologists, oncologists, radiotherapists, pathologists and if necessary other disciplines is required to optimize patient care. These individual therapy recommendations are presented in the format of an interdisciplinary tumorboard" where each case is discussed. At the end of the congress, relevant topics and current developments are summarized in the closing session "Urologie kompakt". It acts as a souvenir for our everyday work.

The new CCH guarantees an event-experience in the best city area and gives you a warm welcome to the cosmopolitan metropolis Hamburg in one of the most modern and largest congress centers in Europe.

Hamburg, "my pearl", the pretty one", as the city is called affectionately by some Hamburgers, and we all look forward to you coming!

Prof. Dr. Margit Fisch
President of the German Society for Urology and the DGU-Team

REGISTRATION AND SUBMISSION OF ABSTRACTS

REGISTRATION

The registration for the congress takes place online via the website: www.dgu-kongress.de

Congress-registration starting date:	1 April 2022
Early registration discount until:	15 July 2022
Congress:	21 - 24 September 2022

ABSTRACTS

Abstracts can be submitted in German or English. An abstract shouldn't include more than 1.800 symbols, including spaces and punctuation marks (1. Question, 2. Material and methods, 3. Results, 4. Conclusions).

Employees of industry companies cannot be lecturers. They can only be co-authors. Different institutions should be labelled and a possible fund (third party fund) should be indicated at the end of the abstract.

Please visit the congress homepage for further details and follow the guidelines for the submission of abstracts - especially for the updated overview of topics. All authors agree the abstracts to be published by the DGU once they have been accepted.

Enrollment for scientific contributions: www.dgu-kongress.de

Online activation:	15 December 2021
Deadline:	1 March 2022, 24:00

FILM CONTRIBUTIONS

Abstracts can be submitted in German or English. An abstract shouldn't include more than 1.800 symbols, including spaces and punctuation marks (1. Question, 2. Material and methods, 3. Results, 4. Conclusions).

Film contributions are exclusively to be submitted/uploaded on the platform for abstracts.

After submitting an abstract, further instructions will be given on how to submit film material.

To ensure an optimal quality standard of film contributions for the DGU congress the only accepted video format is a mp4 format

Run time:	max. 15 minutes
Sound recording:	German or English
